

STUCK IN
FUCKING
TRAFFIK

This zine is a compilation of behind the scenes photographs of a powerful body of work, brought together by a collective of super talented creatives that all met online randomly. Part short film and part wearable art installation, the project will launch in March 2017 in several cities around the world, to bring greater attention to human sex trafficking through the creative tools at our disposal: fashion, film, photography, installations , happenings & publications.

What is Human Trafficking and Slavery? The United Nations Trafficking protocol defines human trafficking as the recruitment, transfer, transportation, captivity or possession of a person for the purposes of exploitation.

Our mission: We believe our role as artists and designers is to bring these issues to the forefront. Generating a profit of \$99Billion per year (66% in sex trafficking alone!), sex traffickers use violence, deceit, debt bondage and other forms of coercion to compel adults and children to engage in horrific sex acts against their will for commercial gain. This is happening right now in every country.
